

Safety Declaration

for returning components and products

F-RET-01-DE

Glaston Germany GmbH

Karl-Lenhardt-Straße 1-9

D-75242 Neuhausen-Hamberg

The protection of people and the environment together with associated legal provisions make it essential to fully complete this declaration and sign it before enclosing it within the shipping documents.

Should this document not be fully completed or enclosed within the shipping documents, your shipment will not be processed and could be rejected.

Should any aggressive, caustic, flammable, toxic or water-polluting materials have been used in its operation, then all parts that have come into contact with the medium and/or any other affected parts must be emptied carefully, decontaminated and flushed out.

The return shipment must be packaged in suitable and secure shipping containers before being labelled with details of the materials or hazardous substances that were in contact with the contents. This provides an important contribution which prevents personal injury or property damage from occurring via material residues or hazardous substances.

Product information:

<i>Product designation</i>	
<i>Product number / Item number (if available)</i>	<i>Manufacturer</i>

Medium category:

Please check the relevant hazards as there are a number that will affect the contents.
